

PETER GABRIEL LOPEZ

Backend Software Engineer | AI Automation Specialist

Iloilo City, Philippines | +63 976 126 0783 | lopezpetergabriel@gmail.com | github.com/petergabriel-dev | [LinkedIn](#)

PROFILE SUMMARY

Backend Software Engineer and AI Automation Specialist with hands-on production experience across Go, PHP (Laravel), Python, and modern automation ecosystems (n8n, Make.com, GoHighLevel). Track record of delivering full-stack systems and self-healing agentic workflows for multiple concurrent freelance clients, from Laravel/React platforms to multi-agent AI orchestration. Currently employed full-time as a Data Analyst for a regional government office while actively available for part-time and contract engagements, including evenings, weekends, and flexible hours to fit client timezones.

TECHNICAL SKILLS

Backend & Cloud: Go (Golang), PHP (Laravel), Python (Production-Grade), MySQL, SQL, Docker, Vercel, Git/GitHub, REST APIs

Frontend: React, JSON, Webhooks

Automation Ecosystems: n8n (Multimedia & Data Workflows), Make.com, GoHighLevel (GHL), Multi-Agent Orchestration

AI Harness Engineering: OpenRouter, Pi Agent Harness, Pi Coding Agent, Hermes Agent, OpenClaw, Claude Code, Claude Cowork, OpenAI Codex Auth (agent integration), Kie.ai APIs

CRM & Sales Systems: GoHighLevel (GHL), Odoo, Folk CRM, Mailchimp, Funnel Architecture

FREELANCE & CONTRACT EXPERIENCE

Lead Automation Specialist at Adsome (Stromberg Media AB)

Remote (Sweden-based client) | January 2026 to Present | Part-time, ~20 hrs/week

- Design, build, and maintain automation workflows (n8n, GoHighLevel, AI agents) that solve business problems independently, with minimal day-to-day oversight.
- Proactively identify operational bottlenecks and deliver new automations and AI integrations to increase efficiency and revenue.
- Maintain and troubleshoot production automation systems, including lead nurturing, reporting, and content pipelines, ensuring consistent uptime.
- Document all built systems to ensure long-term scalability and smooth handoff.

Freelance Automation Consultant at Theory of Khaos

Remote | UK-Based Brand Strategy Studio | January 2026 to June 2026

- Built the studio's end-to-end client-intake automations in Make.com, capturing Stripe payments and Tally application submissions, routing leads into Folk CRM, and triggering Mailchimp enrollment and Slack alerts.
- Migrated lead capture from Folk CRM to GoHighLevel by rebuilding the Make.com routing so Stripe and Tally leads flowed directly into GHL, then configured GHL-native automations for lead and opportunity management.
- Developed an n8n-based AI research workflow that mines the studio's repository of closed-deal leads to surface brand-positioning insights for future prospecting.

Multimedia Specialist & AI Automation Lead at Sieitz Innovations OPC

Iloilo City | August 2025 to May 2026

- Automated complex multimedia pipelines in n8n, integrating Generative AI models (Google Veo, Seedream) to auto-generate image, video, and audio assets, cutting manual editing time by 70%.
- Engineered a multi-agent n8n workflow (Researcher, Strategist, Copywriter agents) that autonomously produces comprehensive branding guides with bi-directional Notion syncing.
- Built an API-driven video ad generator integrating Google Veo 3 and Seedream V3, converting static food imagery into ad-ready video clips for social campaigns.
- Developed a Dockerized Go backend/API for a full-stack AI content platform where users can generate images and videos and create content calendars; separately deployed the company's static portfolio website on Vercel.

FULL-TIME EMPLOYMENT

Data Analyst at Department of the Interior and Local Government (DILG), Region VI

Iloilo City | June 2026 to Present

- Leading the design and development of a digitalized data warehouse system (PHP/Laravel, MySQL, React, Git) to transition the Regional Office from paper-based records to a unified digital platform.
- Selected as resource person for a Capability Development Activity on Data Organization and Management for the Monitoring and Evaluation of LGSF Projects, cum 3rd Quarter Program Implementation Review with PDMU personnel.
- Also provide general IT support, multimedia documentation, and event technical operations (livestream, AV) for the Regional Office, and remain open to part-time and contract work outside core office hours (evenings/weekends).

Automation Engineer & CRM Intern at Zenlabs Venture Management Inc.

Iloilo City | January 2025 to May 2025

- Contributed to full-stack development of 'Internsheet' and designed GoHighLevel/Odoo CRM automations for lead management.

EDUCATION

Bachelor of Science in Computer Science

Iloilo Science and Technology University | 2021 to 2025 | Test of Practical Competency in IT, Passer (2025)
